WORK EXPERIENCE

Software Developer
Zenitech

03/2022 - Present
Achievements/Tasks

- Contributed to an international web development team, leveraging Next.js 13 and the latest technologies, including React Testing Library, to deliver a high-performance gambling web application for a prominent client.
- Developed and deployed a game-changing web app for global enterprises, providing essential utilities and tools; boosted operational efficiency by automating key processes and saving an average of 200 hours per month.
- Contributed to the development of a variety of features, including data handling and visualizations, reporting and workflow management utilizing modern technologies such as Typescript, React, SaSS.
- Implemented React Testing Library, Cypress, and Puppeteer to conduct comprehensive testing, resulting in a 40% decrease in production defects and a 25% improvement in overall software quality.
- Writing clean, easy to maintain and expand code and performing code reviews to make sure the team adheres to the standards.
- Creating and maintaining E2Es tests using Cypress, Puppeteer, unit tests using React Testing library.
- Monitoring the application and intervening to fix the problems when any are encountered.

Software Developer
7Code

03/2021 - 03/2022   *Cluj-Napoca*
Achievements/Tasks

- Worked on two different applications, one was a web application and the other one was mobile
- The web application offered improved security for personal data and allowed users to create and store emotional and informative legacies and it was built using NextJS
- Contributed to the development of features such as message and document collections, as well as user authentication and data encryption
- The mobile application was used in the automotive industry and was implemented in React Native for the frontend and NestJS for the backend services
- Worked both on new features but also improving the existing ones
- Contributed to the development of features such as document scanning, expiration tracking and notification systems
- Implemented and maintained unit tests, performed code reviews for both applications

Junior Web Developer
Freshbyte

03/2018 - 03/2021   *Cluj-Napoca*
Achievements/Tasks

- Worked on 3 different projects
- The travel applications, both web and mobile, were mainly addressed to hotel owners and managers who want to improve their management process, providing a safer and seamless guests experience
- Tech Stack: React, React Native, Material UI, mySql, restAPIs
- The other two web applications were educational, and they were the place where people can get in touch with the latest trends in technology, worked both on implementing new features and maintaining existing ones, with a keen eye for the code quality
- HTML, CSS, Javascript, PHP, Wordpress

EDUCATION

Automation & Computers Science
Faculty of Automation and computer Science, Technical University, Cluj-Napoca, Bachelor of Computer Science, October 2016 - July 2020

10/2016 - 07/2020   *Cluj-Napoca*
